

FOR IMMEDIATE RELEASE: (March 01, 2007)

**Technical Toolboxes Canada Releases Enterprise Education Management System (EMS)**

Calgary, AB, March 01, 2007 – Technical Toolboxes Canada, Ltd. has a new Tool added to the MyCompany Toolbox. and it is the Education Management System or EMS. The EMS is an enterprise level system for managing corporate training. The system ties external training or customer training to corporate account records for single entry record keeping. The system is used for creating permanent training records of everyone involved in a training class such as students, managers, and trainers. The system has an evaluation system built in that creates custom evaluation forms and captures the results of the evaluation for business analysis and reporting.

The EMS system is web-based and located at [www.mycompanytoolbox.com](http://www.mycompanytoolbox.com). The system is freely available (one month trial period) to anyone with an internet connection and one of the major Web browsers (Internet Explorer, Firefox, Opera, Netscape). The system is available immediately and is installed in the current version of the MyCompany Toolbox for all to start using. The system is web-based and delivered through a secure website with login and password protection of all data and communications on the system. The system setup is self-serve on the website and TTC is standing by to assist with the setup via telephone, Skype, or email.

There is a current consciousness that well managed data is important to business success. The EMS gives all enterprises, large or small the ability to manage important training and education initiatives in the enterprise. The system provides easy-to-use Tools or features for business process automation, reporting, and communication. All information is stored in a single corporate database. The EMS is uniquely designed to give the Enterprise the ability to socialize and manage the education portion of the business in order to create an open business environment and provide a richer experience for the customers and employees alike. The system is designed for all enterprises large and small who are looking to automate their business processes.

Technical Toolboxes Canada, Ltd. is a software development company with a focus on Business Process Automation (BPA), Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), Sales Force Automation (SFA) and other business automation opportunities.
