

FOR IMMEDIATE RELEASE: (March 19, 2007)

Technical Toolboxes Canada Agrees to Co-Develop Plant and Pipeline Inspection Business Software

Calgary, AB, March 19, 2007 – Technical Toolboxes Canada, Ltd. and TechCorr USA, LLC signed an agreement to work together to develop special business process automation tools for the Plant and Pipeline Inspection business. The two companies will work together to develop the following new systems, business utilities, and Tools:

1. Project Scheduling & Management Module (PS&MM) is used to run company projects in a collaborative environment. The PS&MM is designed to support all the major features of popular desktop based project management systems with the added benefit of being web-based and designed to support a geographically diverse business.
2. Asset Management Tool (AMT) version 2.0 is designed to include photo uploads, and vehicular tracking. The new expanded system will include several KPI reports to get more value from the asset base.
3. The Human Resource Tool (HRT) version 2.0 is designed to include specific legal requirements for the heavily regulated inspection business. The system will include drug testing, and professional certification management.

The system is web-based and delivered through a secure website with login and password protection. All data and communications on the system are RC4 128 bit encrypted to meet the most critical security needs. The system setup is self-serve on the website and TTC is standing by to assist with the setup via telephone, Skype (VoIP), or email.

There is a current consciousness that well managed data is important to business success. The MyCompany Toolbox Version 3.5 gives all enterprises, large or small the ability to manage assets, contracts, and HR at a professional level. The system provides easy-to-use Tools or features for business process automation, reporting, and communication. All information is stored in a single corporate database. MyCompany Toolbox is uniquely designed to give the Enterprise the ability to socialize and manage the business in order to create an open business environment and provide a richer experience for the customers and employees alike. The system is designed for all enterprises large and small who are looking to automate their business processes.

Technical Toolboxes Canada, Ltd. is a software development company with a focus on Business Process Automation (BPA), Enterprise Resource Planning (ERP), Customer Relationship Management (CRM), Sales Force Automation (SFA) and other business automation opportunities.

TechCorr USA, LLC (www.TechCorr.com) is a full service engineering and inspection services company headquartered in Houston, Texas with over 200 employees in 8 offices internationally.
